ADMINISTRATOR OF EMERGENCY MANAGEMENT

FOR IMMEDIATE RELEASE

March 30, 2016

April 1, 2016 SIREN AND EMERGENCY ALERT SYSTEM TEST

HONOLULU — The Hawaii Emergency Management Agency monthly test of the statewide outdoor siren warning system, coordinated with the test of the live audio broadcast segment of the Emergency Alert System, is scheduled for **Friday, April 1, 2016, at 11:45 a.m.**

The siren test is a steady one minute tone on all sirens. The steady tone is used to alert the public to any emergency that may pose a threat to life and property. Besides natural hazards, the Emergency Alert System could be used for terrorist incidents or acts of war.

Contact your county civil defense/emergency management agency to report siren operations issues:

Hawaii (808) 935-0031
Maui (808) 270-7285
City and County of Honolulu (808) 723-8960
Kauai (808) 241-1800

Oahu residents in areas surrounding Campbell Industrial Park may also hear a “whooping” tone following the monthly siren test. These areas include portions of Kalaeloa, Makakilo, Nanakuli, Kapolei, & Ewa Beach. The “whooping” tone is a test of a Hazardous Materials (HAZMAT) condition to the hazardous materials siren warning group. These sirens can be activated in the event of an actual HAZMAT incident requiring emergency notification of businesses, schools and residents within the vicinity of Campbell Industrial Park. Contact the City and County of Honolulu Department of Emergency Management at (808) 723-8960 for more information on the hazardous materials siren warning group.

When the siren signal is sounded in your area, tune to any local radio or television station for emergency information and instructions broadcast by emergency management agencies. Participating stations will carry a detailed explanation of what the sirens mean, as well as other related information, during the monthly test.

- more -

Tests of outdoor warning sirens and the Emergency Alert System are conducted simultaneously, normally on the first working day of the month, in cooperation with Hawaii's broadcasting industry. Emergency management and disaster preparedness information is located in the front section of telephone directories in all counties.
